Greetings, I am writing to you to express my concern over growth hormones in the nations milk supply, and also over the huge expenditures the dairy association goes through to lobby to FDA and the American consumer products that increase the nations health tab. While milk and dairy products do enough harm on their own with saturated fats, it is important that we are safeguarded against growth hormones that increase disease, and carry to many unknowns with them, as well as the use of anti-biotics such that its use in humans is becoming non effective. I know my family has recently switched to Organic milk although it is twice as expensive. At least I am aware of potential problems, and the power of the dairy association. Most of my fellow Americans are NOT and rely on people such as yourself. Your efforts to remove the poisons from our food chain would be appreciated !!!!

Thank You
Philip A. Gormley
